### **SECTION 2. HAZARDS IDENTIFICATION**

#### **GHS Classification**

Based on available data this substance / mixture does not meet the classification criteria.

### GHS label elements

Hazard pictograms	: No H	azard Symbol required
Signal word	No s	gnal word
Hazard statements	Not o HEA Not o ENV	SICAL HAZARDS: lassified as a physical hazard under GHS criteria. _TH HAZARDS: lassified as a health hazard under GHS criteria. RONMENTAL HAZARDS: lassified as an environmental hazard under GHS criteria.
Precautionary statements	No p Resp	ention: precautionary phrases. ponse: precautionary phrases.

VersionRevision Date:SDS Number:Print Date: 2021-04-251.92021-04-24800001029046Date of last issue: 30.01.2020<br/>Date of first issue: 06.10.2010

Storage: No precautionary phrases. Disposal: No precautionary phrases.

#### Other hazards which do not result in classification

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Not classified as flammable but will burn.

#### SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance name	WP SYNTHETIC BLEND SAE 5W-30 MOTOR OIL GF-6A
Chemical nature	<ul> <li>Synthetic base oil and additives. Highly refined mineral oil. The highly refined mineral oil contains &lt;3% (w/w) DMSO- extract, according to IP346.</li> </ul>
	* contains one or more of the following CAS-numbers: 64742- 53-6, 64742-54-7, 64742-55-8, 64742-56-9, 64742-65-0, 68037-01-4, 72623-86-0, 72623-87-1, 8042-47-5, 848301-69- 9, 68649-12-7, 151006-60-9, 163149-28-8.

#### Hazardous components

Chemical name	CAS-No.	Concentration (% w/w)
Interchangeable low viscosity base oil (<20,5 cSt	Not Assigned	0 - 90
@40°C) *		
Alkaryl amine	36878-20-3	1 - 3

#### **SECTION 4. FIRST-AID MEASURES**

If inhaled	: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
In case of skin contact	<ul> <li>Remove contaminated clothing. Flush exposed area with wa- ter and follow by washing with soap if available.</li> <li>If persistent irritation occurs, obtain medical attention.</li> </ul>
In case of eye contact	<ul> <li>Flush eye with copious quantities of water.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>If persistent irritation occurs, obtain medical attention.</li> </ul>
If swallowed	: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.
Most important symptoms	: Oil acne/folliculitis signs and symptoms may include formation

Version 1.9	Revision Date: 2021-04-24	SDS Number: 800001029046	Print Date: 2021-04-25 Date of last issue: 30.01.2020 Date of first issue: 06.10.2010
and effects, both acute and delayed		•	les and spots on the skin of exposed areas. result in nausea, vomiting and/or diarrhoea.
Protection of first-aiders		appropriate pe	stering first aid, ensure that you are wearing the ersonal protective equipment according to the y and surroundings.
Notes to physician		: Treat symptor	natically.

### **SECTION 5. FIRE-FIGHTING MEASURES**

Suitable extinguishing media		Foam, water spray or fog. Dry chemical powder, carbon diox- de, sand or earth may be used for small fires only.
Unsuitable extinguishing media	: [	Do not use water in a jet.
Specific hazards during fire- fighting	ہم و ر	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.
Specific extinguishing meth- ods		Use extinguishing measures that are appropriate to local cir- cumstances and the surrounding environment.
Special protective equipment for firefighters	g la E a	Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if arge contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

### SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protec- tive equipment and emer- gency procedures	:	Avoid contact with skin and eyes.
Environmental precautions	:	Use appropriate containment to avoid environmental contami- nation. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.
		Local authorities should be advised if significant spillages cannot be contained.
Methods and materials for containment and cleaning up	:	Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth

Version 1.9	Revision Date: 2021-04-24	SDS Number: 800001029046	Print Date: 2021-04-25 Date of last issue: 30.01.2020 Date of first issue: 06.10.2010
		Soak up residue	nment material. directly or in an absorbent. e with an absorbent such as clay, sand or other al and dispose of properly.
Additional advice		see Section 8 o	n selection of personal protective equipment If this Safety Data Sheet. n disposal of spilled material see Section 13 of a Sheet.

## SECTION 7. HANDLING AND STORAGE

General Precautions	:	Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk as- sessment of local circumstances to help determine appropri- ate controls for safe handling, storage and disposal of this material.
Advice on safe handling	:	Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning mate- rials in order to prevent fires.
Avoidance of contact	:	Strong oxidising agents.
Product Transfer	:	Proper grounding and bonding procedures should be used during all bulk transfer operations to avoid static accumulation.
Storage		
Other data	:	Keep container tightly closed and in a cool, well-ventilated place. Use properly labeled and closable containers.
		Store at ambient temperature.
Packaging material	:	Suitable material: For containers or container linings, use mild steel or high density polyethylene. Unsuitable material: PVC.
Container Advice	:	Polyethylene containers should not be exposed to high tem- peratures because of possible risk of distortion.

VersionRevision Date:SDS Number:Print Date: 2021-04-251.92021-04-24800001029046Date of last issue: 30.01.2020Date of first issue: 06.10.2010

### SECTION 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

#### Components with workplace control parameters

		exposure)	concentration	
Oil mist, mineral	Not Assigned	TWA (Mist)	5 mg/m3	OSHA Z-1
		TWA (Inhal-	5 mg/m3	ACGIH
		able particu-	-	
		late matter)		

#### **Biological occupational exposure limits**

No biological limit allocated.

#### **Monitoring Methods**

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods http://www.cdc.gov/niosh/

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.osha.gov/

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hse.gov.uk/

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany http://www.dguv.de/inhalt/index.jsp

L'Institut National de Recherche et de Securité, (INRS), France http://www.inrs.fr/accueil

Engineering measures	<ul> <li>The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations.</li> </ul>
	Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.
	General Information: Define procedures for safe handling and maintenance of controls. Educate and train workers in the hazards and control measures relevant to normal activities associated with this product. Ensure appropriate selection, testing and maintenance of

### **Environmental exposure controls**

General advice	<ul> <li>Take appropriate measures to fulfill the requirements of relevant environmental protection legislation. Avoid contamination of the environment by following advice given in Section 6. If necessary, prevent undissolved material from being discharged to waste water. Waste water should be treated in a municipal or industrial waste water treatment plant before discharge to surface water.</li> <li>Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapour.</li> </ul>

### SECTION 10. STABILITY AND REACTIVITY

Versior 1.9	Revision Date: 2021-04-24	SDS Number:Print Date: 2021-04-25800001029046Date of last issue: 30.01.2020Date of first issue: 06.10.2010	
Reactivity		: The product does not pose any further reactivity h addition to those listed in the following sub-parage	
Chemical stability		: Stable.	
Possibility of hazardous reac- tions		: Reacts with strong oxidising agents.	
Co	onditions to avoid	: Extremes of temperature and direct sunlight.	
Incompatible materials		: Strong oxidising agents.	
	zardous decomposition	: No decomposition if stored and applied as directe	d.

### SECTION 11. TOXICOLOGICAL INFORMATION

Basis for assessment	:	Information given is based on data on the components and the toxicology of similar products.Unless indicated otherwise,
		the data presented is representative of the product as a
		whole, rather than for individual component(s).

### Information on likely routes of exposure

Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

### Acute toxicity

#### Product:

Acute oral toxicity	:	LD50 (rat): > 5,000 mg/kg Remarks: Low toxicity: Based on available data, the classification criteria are not met.
Acute inhalation toxicity	:	Remarks: Based on available data, the classification criteria are not met.
Acute dermal toxicity	:	LD50 (Rabbit): > 5,000 mg/kg Remarks: Low toxicity: Based on available data, the classification criteria are not met.

### Skin corrosion/irritation

#### Product:

Remarks: Slightly irritating to skin. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Based on available data, the classification criteria are not met.

### Serious eye damage/eye irritation

#### Product:

Remarks: Based on available data, the classification criteria are not met.

### Aspiration toxicity

### Product:

Not an aspiration hazard.

#### **Further information**

#### Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal.

ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Continuous contact with used engine oils has caused skin cancer in animal tests.

Remarks: Slightly irritating to respiratory system.

## SECTION 12. ECOLOGICAL INFORMATION

Basis for assessm	ent :	Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representa- tive of the product as a whole, rather than for individual com- ponent(s).(LL/EL/IL50 expressed as the nominal amount of product required to prepare aqueous test extract).

# SECTION 13. DISPOSAL CONSIDERATIONS

# Disposal methods

Waste from residues

: Recover or recycle if possible.

Version 1.9	Revision Date: 2021-04-24	SDS Number: 800001029046	Print Date: 2021-04-25 Date of last issue: 30.01.2020 Date of first issue: 06.10.2010	
		toxicity and ph determine the ods in complia	nsibility of the waste generator to determine the ysical properties of the material generated to proper waste classification and disposal meth- nce with applicable regulations. e into the environment, in drains or in water	
		ground water,	should not be allowed to contaminate soil or or be disposed of into the environment. r used product is dangerous waste.	
Contaminated packaging		to a recognize the collector of Disposal shou	: Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.	
Local legislation Remarks : Disposal should be in accordance with applic national, and local laws and regulations.				

### **SECTION 14. TRANSPORT INFORMATION**

### **National Regulations**

#### TDG

Not regulated as a dangerous good

### **International Regulations**

### IATA-DGR

Not regulated as a dangerous good

#### IMDG-Code

Not regulated as a dangerous good

### Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable for product as supplied. MARPOL Annex 1 rules apply for bulk shipments by sea.

#### Special precautions for user

Remarks

: Special Precautions: Refer to Section 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.
